

Short Throw Deadbolt Projection Style

4070 Series

ANSI/BHMA Type E8212 (Grade 2)

▼ Cylinder Backset

7/8", 31/32" or 1-1/8" only.

▼ Case

Steel with corrosion-resistant plating. 1" x 6" x depth. (Depth varies by backset. See table on back page.)

▼ Function

For installations where the long-throw MS® Deadlock cannot be accommodated, the smaller 4070 offers the longest practical throw for a conventionally projected bolt from a narrow stile. Operates with one-half key turn of any standard mortise type cylinder or cylinder type thumbturn. NOT TO BE USED IN BOTTOM RAIL.

▼ Bolt

5/8" x 1-1/4" x 5/8" throw.

▼ Strike

In metal installations, a slot in jamb serves as strike. Deluxe trim strike 4170 is also available for wood installations.

▼ Operation

180° turn of key or thumbturn projects or retracts the bolt. Accepts any standard 1-5/32" mortise cylinder from either or both sides. Cylinder must have cam to fit. (See catalog page SW-28.)
