Strategic partnership.
Professional quality.
Unsurpassed security.

Our long-standing partnership with the United States Postal Service (USPS), enables us to be the only manufacturer able to provide you with the highest quality products designed to meet the most stringent USPS standards. In 2005 for example, the United States Postal Service selected Florence Manufacturing as its single source supplier of cluster box units. We are proud to offer you the same quality and security the USPS depends on day in and day out.

Florence Manufacturing plant in Manhattan, KS

Quality Manufacturer Since 1934

Centrally located to the U.S. in Manhattan, Kansas, Florence Manufacturing is proud to be the nations oldest and leading supplier of mailboxes and mailbox accessories. Providing the most comprehensive product lines within the industry, we are a certified ISO 9001:2000 and Underwriters Laboratory audited manufacturer. Florence Manufacturing is a vertically integrated plant featuring on-site fabrication, state-of-the-art powder coating and robotic welding.

This cutting edge facility boasts a recycling program second to none with our powder reclamation program as well as extensive corrugate, steel and aluminum recycling programs.

USPS Partnership

Florence Manufacturing continues to dedicate itself to providing secure postal speciality products built to the latest USPS standards. We are the only manufacturer authorized to provide F series cluster box units, outdoor parcel lockers and replacement pedestals and parts to the USPS since they awarded Florence Manufacturing their single-source contract for outdoor delivery equipment in 2005. We are also extremely proud to have been awarded the USPS Quality Supplier Award in 2003 and 2005 as well as most recently the prestigious USPS Supplier Excellence Award in 2006.

Find an Authorized Florence Dealer

Florence Manufacturing is proud to have built relationships with the most extensive national dealer network in the industry. Authorized Florence Dealers are located from coast to coast and are ready to assist you from specification to final installation. By utilizing local expertise rather than buying direct from the factory, you are guaranteed personalized local service to meet your needs for each and every project. To find an Authorized Florence Dealer nearest you, visit us at auth-florence.com or call 800-275-1747.

Do It Yourself Online Tools

Want to determine what your project needs are on your own? You can visit us at auth-florence.com 24/7 to configure a mail system that satisfies your specific project needs, browse product information, download technical documents and much more!
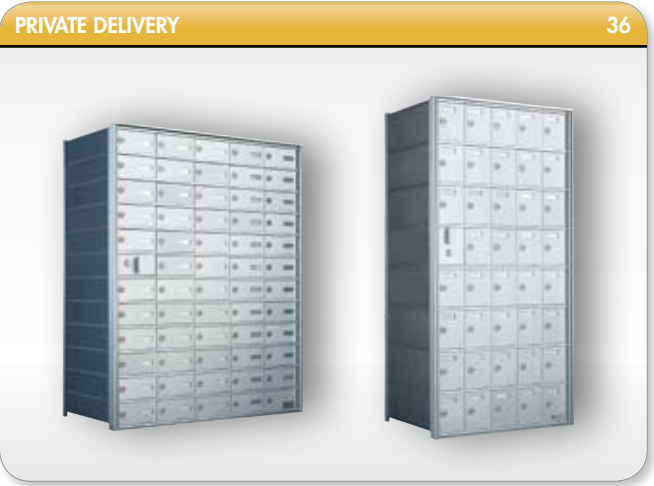

Configurator

Florence Manufacturing's one-of-a-kind mailbox product/system configurator will help guide you step by step in creating a mail system to fit your individual needs. This unique system will also provide you with CAD drawings of your selection as well as access to quote your creation by an Authorized Florence Dealer. Simply visit auth-florence.com night or day to access this useful tool!

Downloads

Looking for product specific drawings, technical information, color images, brochures or postal regulations? It's all located at auth-florence.com. Simply click the downloads navigation tab for instant access to a multitude of technical, dimensional, and promotional material.

Durable, Multi-Compartment Mailboxes for Residential and Commercial Applications

The Florence vital™ 1570 series cluster box unit design has been adopted by the USPS as the design standard for all CBUs manufactured in the United States. As the original manufacturer of the F Series, Florence is pleased to offer a complete line of USPS approved cluster box units. To fit your individual project needs, we now offer six optional powder coat pebble finishes. We are honored to have been selected as the sole supplier of CBUs to the USPS and proud to offer you the same security and reliability that the USPS depends on every day.

Designed especially for and used by the United States Postal Inspection Service

The Florence vigilant™ 1565 series high security cluster box unit was designed specifically for the U.S. Postal Inspection Service. Built to combat mail theft and reduce break-in damage in high crime areas, its robust security features make the vigilant™ high security CBU incredibly secure. Available exclusively from an Authorized Florence Dealer, this product line is an extension of our already strong vital™ CBU series with the benefit of additional tamper resistant features. Give your neighborhood that extra peace of mind by adding a Florence vigilant™ high security CBU.

Unique vigilant™ Features

- Thicker, reinforced gate
- Special security collar on all compartment locks
- Heavier gauge aluminum cabinet wrapper
- Larger diameter 1/4" hinge rod on all doors
- Reinforced shelf above and below the carrier access door to deter break-ins
- Stainless steel parcel door hinge for added strength
- Heavy duty stainless steel pedestal
- High security mounting hardware included

- Prepared for number placards 1-20, 1P-3P
- Exclusive Florence multi-unit connector kit hardware (patent pending) included with every mailbox model for convenience and ease of installation

NEW 4C Rear-Load

Florence Manufacturing is pleased to introduce a brand new USPS approved rear-load option for our extensive versatile™ 4C product line. When installed in a wall that opens into a secure room, our new exclusive design allows for faster mail delivery while still providing the smooth, sleek look you have come to depend upon. *(The rear-load dimensions are the same as our front-load options.)* Contact an Authorized Florence Dealer or visit auth-florence.com for additional product details.

NEW 4C Collar

Don't have the wall depth to completely recess your versatile™ 4C mailbox suites? Not to worry, Florence Manufacturing has created a brand new collar for each module in the entire versatile™ 4C product line. This new collar allows you to mount your 4C mailbox suites while still giving your mail system a sleek, finished look. Contact an Authorized Florence Dealer or visit auth-florence.com for availability and additional product details.

Lock Type

The versatile™ 4C series comes standard with a K91910 lock in each tenant compartment door.

Did you know?

Florence Manufacturing has the most extensive line of USPS STD-4C approved mailbox suites in the industry. An Authorized Florence Dealer can help you find just the right size product for your individual project needs.

MUCK - Multi-Unit Connector Kit

Florence Manufacturing includes a specialized multi-unit connector kit (patent pending) with each 4C versatile™ mailbox module for easy installation of multiple 4C mailbox layouts in a single rough opening. Use of this hardware is optional depending upon project layout and installer preference. This unique kit helps to complete a beautiful, flush installation by eliminating the need for studs and reduces the separation between mailbox units.

USPS Approved New Construction | Mail Shelters and Site Amenities | USPS Approved | USPS Approved for Replacement | Private Delivery | Drop / Collection Boxes | Chimes | Postal Accessories, Locks and Parts
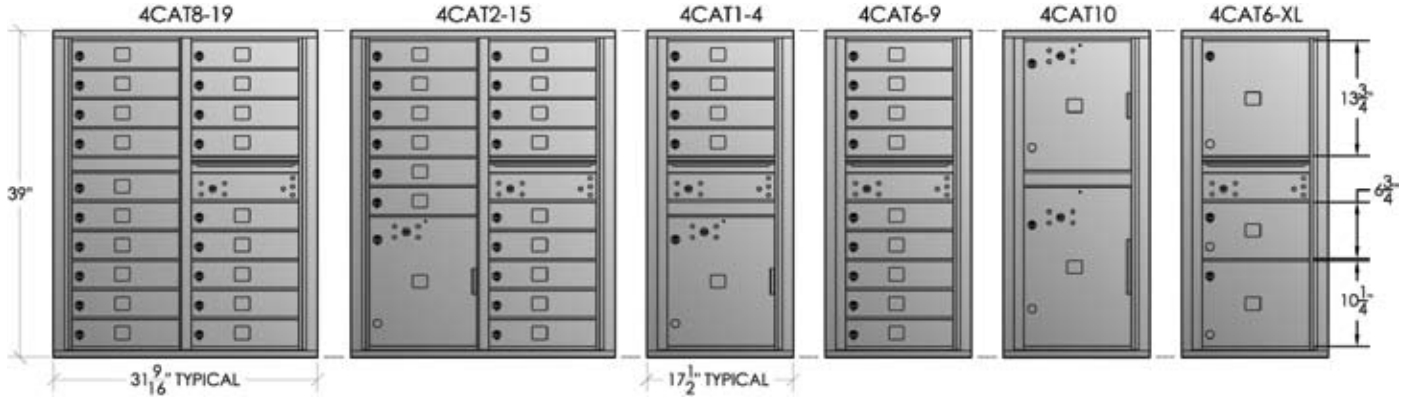

No calculating or configuring needed ... just three easy steps:

1) Mix 'n match our extensive USPS approved module options to suit your project's size and style.
2) Choose your compartment identification – use standard number placards or let us engrave the doors to suit your needs.
3) Select your finish color from eight architectural powder coat options. You're done!

New Construction Solutions

Florence Manufacturing takes great pride in providing comprehensive product lines to meet all your project needs - and the versatile™ 4C mailbox line is no exception!

This complete line of products gives you the versatility you need to complete your individual project while still adhering to the new mandatory USPS STD-4C regulation.

Before you begin construction, be sure to consult with an Authorized Florence Dealer who can assist you from specification to installation.

NEW Postal Regulations

The STD-4C, which now applies to all Wall-Mounted Centralized Mail Receptacles, replaces the previous STD-4B+ regulation for Receptacles/ Apartment/House Mail, and became mandatory in October 2006 for all new construction and major renovation projects. In order to determine the precise regulations which would make up the new STD-4C, the USPS created an Apartment Consensus Committee to generate feedback. The committee was comprised of various members (including Florence Manufacturing) who represented mailbox manufacturers, mailbox resellers and servicers, property owners and managers, and the USPS. This committee met for over one year to discuss and ultimately agree upon the requirements that now make up the mandatory STD-4C regulation.

The USPS STD-4C specification creates a new form factor and increases the minimum size requirement (12″ W x 15″ D x 3″ H); completely eliminating the vertical form factor (5″ W x 6″ D x 15″ H). STD-4C also requires one parcel locker per ten tenant compartments. Security features and lock design requirements are more stringent, which includes mandatory security testing done by the USPS. More product details as well as the full STD-4C regulations are available by contacting an Authorized Florence Dealer or by visiting auth-florence.com.

Florence Manufacturing is pleased to offer the most in-depth line of USPS approved 4C products available on the market today. Our seven different lines of versatile™ 4C mailbox suites with thirty different modules offer flexibility without the fuss. Mix 'n match 4C modules to configure the perfect mailbox system to fit your project needs.

versatile™ 4C Accessibility Details

[1]Standards Governing the Design of Wall-Mounted Centralized Mail Receptacles. Federal Register/Vol. 69, No 171/September 3, 2004/ Rules and Regulations POSTAL SERVICE, 39 CFR Part 111.

[2]ADA Standards for Accessible Design, Department of Justice Code of Federal Regulations, 28 CFR Part 36, Appendix A, Section 4.2 Space Allowance and Reach Ranges.

[3]Accessible and Usable Buildings and Facilities, International Code Council/American National Standard Institute (ICC/ANSI A117.1-2003), Chapter 3 Building Blocks, Section 308 Reach Ranges. NOTE: The 2006 International Building Code (IBC 2006) also refers to this ANSI Standard for accessibility building guidelines.

Notes:
All STD-4C compliant mailboxes must meet the U.S. Postal Service's design and installation regulation in order to receive the "USPS Approved" designation. Accessibility regulations may vary locally and regionally. Therefore, always consult local building code authorities for applicable accessibility codes related to your mailbox project.

A "Yes" rating in the chart above was assigned only if ALL mailboxes in the entire Florence versatile™ suite met the referenced regulation. A 4C suite that has been assigned a "No" rating will have some rows of mailboxes that DO meet the accessibility regulation, but others which do not. This "Accessibility Guide" is designed to help you determine which Florence 4C mailbox suite meets your individual project specifications.

Sequential numbering (rather than assigning mailbox IDs that match apartment or house numbers) of mailbox compartments may allow greater flexibility in providing accessible mailbox compartments that meet accessibility regulations applicable in your area. Sequential numbering of mailbox compartments also provides greater security and privacy for your residents.

An Accessibility Guide for Florence's versatile™ 4C mailbox suites is available to assist you in selecting USPS Approved STD-4C compliant mailboxes which meet your project requirements and local accessibility codes. You may download this reference document by visiting our website at auth-florence.com/downloads, or by contacting your local Authorized Florence Dealer.

Installation Instructions

Florence Manufacturing STD-4C product installation instructions adhere to USPS regulations. Other suite installation details are available by contacting your local Authorized Florence Dealer or by going online to auth-florence.com.

Installation requirements specified in the U.S. Postal Service STD-4C regulation are outlined below:

1. At least one customer compartment shall be positioned less than 48 inches from the finished floor.

2. No parcel locker compartment (interior bottom shelf) shall be positioned less than 15 inches from the finished floor.

3. No patron (tenant) lock shall be located more than 67 inches above the finished floor.

4. No customer compartment (interior bottom shelf) shall be positioned less than 28 inches from the finished floor.

5. The USPS Arrow lock shall be located between 36 and 48 inches above the finished floor.

Excellent Design Fits In!

Vario™, the first turnkey, fully customizable 4C configurable mail shelter kit, originated from the desire for more architecturally pleasing design options for the USPS preferred method of centralized mail delivery. By adding your own roofing and siding materials, the vario™ allows design and building professionals the flexibility and opportunity to personalize the final product for full integration within the neighborhood and surrounding architecture. The pre-engineered shelter kit comes complete with Hilti anchors to secure the mail shelter to your existing concrete pad. Florence Manufacturing also makes it possible to create a true community gathering area, by providing additional site amenities and options. Built to the 2006 International Building Code Standards, the vario™ even offers an option to meet 150 mph wind resistance rating.

The chart above will help you select the shelter size and versatile™ 4C suite modules to best fit your individual project needs. Calculations are based on U.S. Postal Service STD-4C requirement of one (1) parcel locker per ten (10) mailboxes. This ratio may not apply if alternate package delivery arrangements exist at facility. Discuss with local USPS official for questions related to new mailbox delivery system.

Shelter Size and Configuration

Maximums listed above are based on the largest casing configuration of double/single mailbox modules that fit into each type of shelter. Refer to the casing images below to make your versatile™ 4C mailbox module selection. Back-to-back shelters may utilize a different casing configuration on each side of the shelter. Due to casing trim, two single-column modules may not be substituted for a double-column module, except in the casing options shown below.

vario™ I
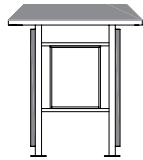

1 Double-Column　　- or -　　2 Single-Column
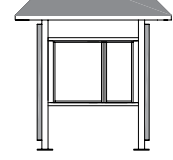

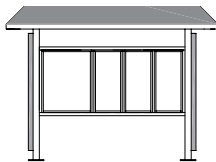

vario™ II

3 Single-Column　　- or -　　1 Double-Column, 1 Single-Column

vario™ III

1 Double-Column, 3 Single-Column　　- or -　　2 Double-Column, 1 Single-Column
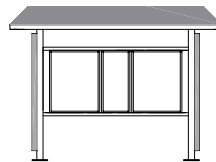

vario™ IV
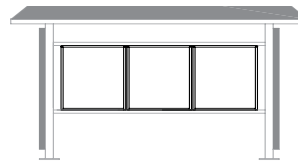

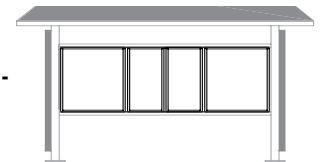

3 Double-Column　　- or -　　2 Double-Column, 2 Single-Column

Online Configurator

Florence Manufacturing also provides a one-of-a-kind online mailbox configurator to take the guess work out of doing it yourself. Simply visit auth-florence.com/cad to be guided step-by-step through the product selection process for your vario™ mail shelter kit. Once you've selected all the appropriate options, you can submit a quote request directly to your local Authorized Florence Dealer. This tool is available day or night and can assist you not only with the pre-engineered shelter kit, but with your Florence versatile™ 4C mailbox suite selection as well.

vario™ mail shelter options

Additional options are available to enhance and strengthen your vario™ mail shelter. The ability to personalize your mail shelter further enables it to blend in with the surrounding architecture, creating a beautiful environment which promotes community gathering.

Interior Side Panel Color Options

Tan   Black   Grey

This interior protective coating will enhance the look and life of your vario™ mail shelter and is available in three color options. (Exterior finishing choices are up to you.) This plywood is pressure preserved in accordance with AWPAC9 for extended life performance and makes an excellent mounting surface for your selected finishings.

LED Lights

Solar or A/C Compatible Kits Available
Enhance your vario™ mail shelter with a lighting option that suits your installation. Sold separately, the LED lighting is designed for integration into the shelter roof design and is activated by heat-detecting motion sensors. Light strips may be either hard wired with the included A/C compatible kit or designed to stand alone with the solar kit option.

Roof Styles
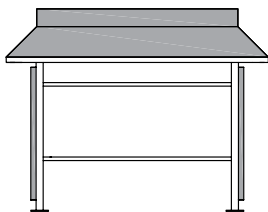

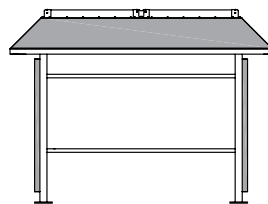

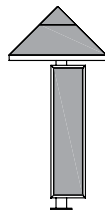

Gable Peak Roof   Skylight Roof
(Available Soon)
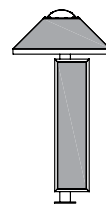

Designed to fit with the surrounding architecture, the roof of the vario™ mail shelter will support your selected custom finishing materials, from asphalt shingles to tile, which you add on-site to either the gable peak or solar light roof options.

Wind Resistance Rating

1. 90 mph = Standard Package

2. 150 mph = Hurricane Package

The vario™ mail shelters are designed and built to meet 2006 International Building Code (IBC) Standards, withstanding a three-second gust of either 90 mph or 150 mph winds depending on shelter package selected. As some geographic areas have local building codes requiring higher levels of wind resistance, check with local building officials before finalizing selection.

NEW Outdoor Public Space Site Solutions

Florence Manufacturing is pleased to offer additional mail station accessories such as solar lights, benches, receptacles, planters and bike racks to help you create a safe, cohesive community gathering area around your mail delivery center. Whether you are simply adding amenities to existing installations, or are creating a complete mail station, we have the solution for you. Our products utilize efficient use of space which will help you develop harmony between your resident's needs and the surrounding environment. The sentinel™ solar site lite comes in either surface or in-ground mounting options and has either a 2' or 5' riser option. Available in three weather-resistant powder coat color options, the sentinel™ is the perfect addition to all your pedestrian settings.

Where Safe Mail Calls Home

Mail security isn't just for apartment buildings; it's for every mailbox in America. That's why Florence Manufacturing offers secure mail solutions for every mail application, including single family residential.

Florence residential products are weatherproof to protect delivered and outgoing mail from the elements. But unlike other boxes, Florence mail receptacles are fabricated with treated aluminum that resist rust and other signs of weathering to protect your investment as well as your mail. Plus, Florence residential mailboxes are large enough to secure up to two-weeks worth of normal mail delivery.

Lock Type

The MB2000 residential mailbox series comes standard with a 200116 lock.

Did you know?

Florence Manufacturing maintains many products in stock so they can be shipped within 48 hours. Contact your local Authorized Dealer for details.

Meeting Postal Regulations Made Easy

Changing postal standards can raise a lot of questions for anyone who deals with apartment mailboxes. The dilemma for property managers is whether to install Security Upgrade Kits (also available from Florence Manufacturing) in existing mailbox units to comply with STD-4B+, to get new mailbox units in compliance with STD-4B+, or to upgrade mailboxes to STD-4C. How do you decide? One easy way is to ask your local postal carrier. They may have recommendations to improve the security and convenience of your mail—a benefit to property managers, residents and the Postal Service alike. It's always a good idea to get the approval of your local postal authority before altering the mail system in your building. That way you can ensure that secure and convenient mail delivery is not interrupted for your residents.

Did you know?

As of October 6, 2006, USPS STD-4C compliant mailbox systems are MANDATORY on all new construction and major renovations. Mailboxes that are 4B+ compliant, such as the Florence 1400/1500 horizontal series, will only be considered USPS Approved if they are replacing existing mailboxes. Be sure to check with your local postal authority before undergoing any changes to your buildings mail system. Further details on the new mandatory regulation can be found on page 14.
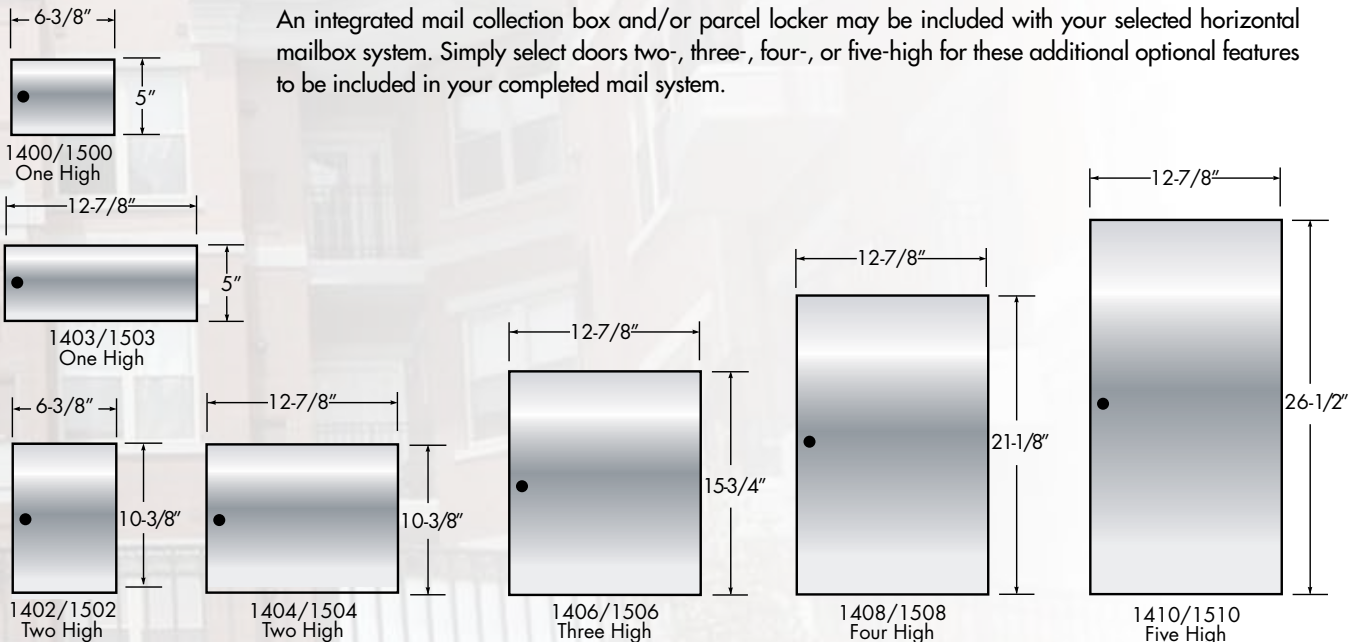

Lock Type Options

Both the 1400 and 1500 horizontal series comes standard with a Hudson K30809 lock. Additional lock options or replacement locks are available, but not necessarily USPS Approved. Refer to page 31 for additional details.

K30809

1400/1500 Door Options

An integrated mail collection box and/or parcel locker may be included with your selected horizontal mailbox system. Simply select doors two-, three-, four-, or five-high for these additional optional features to be included in your completed mail system.

Security Upgrade Kit

Installing a security upgrade kit improves lock strength and greater resistance to the most common methods of attack. Florence Manufacturing kits far exceed the current mailbox safety standards and are designed to harden both the Postal Arrow Lock and Master Gate Door. This USPS approved kit is easy to install, taking only a few tools and a little time.

249	258	(2) 1500-64 (7) 1500-65	24' 2-1/8"
255	264	(1) 1500-64 (8) 1500-65	24' 8-1/2"
261	270	(9) 1500-65	25' 2-7/8"

Above dimensions apply to both 1400 and 1500 series.

*To figure the actual width, deduct 1/4" from the rough opening dimension.

*Orders for non-standard mailbox configurations may not be accepted or may result in longer lead times.

Installation

17" min. wall depth

The minimum wall opening depth is 17". The number of usable units is for rear-loading boxes. If figuring front-loading boxes, choose 1400 Series and deduct one usable unit per box for the master door.

70" max.

Master keying is not permitted by USPS regulations.

28" min.

3/4" plywood suggested (by others)

Note: Horizontal mailbox installations should be protected from direct exposure to weather. The manufacturer is not responsible for damage caused by weather conditions.

Did you know?

STD-4B+ was implemented in late 2004 and applies to apartment mailboxes. This USPS regulation requires improved Arrow lock compartment security on all horizontal and vertical wall-mounted mailboxes. In many cases, the STD-4B+ product designs include hardened Arrow lock bracketry and master gate doors as well as the removal of an outgoing mail slot.

ID Options for Florence Mailbox Systems

Florence Manufacturing provides several different ID options for your replacement mailboxes. Simply select the option that best suits your project needs from the examples shown below.
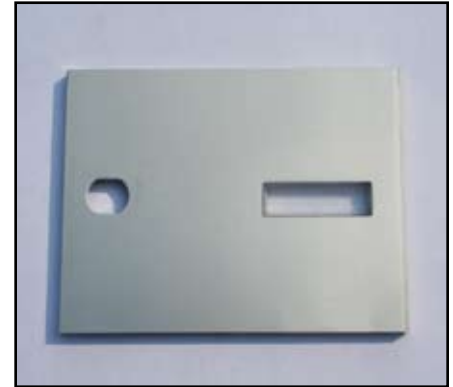

Engraving

Black Fill Engraving

Clear Vision Window

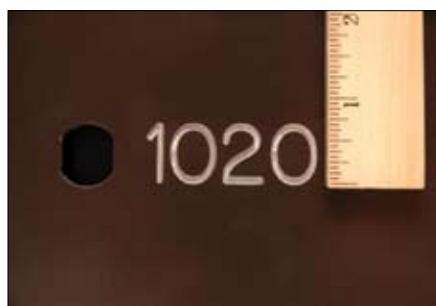

Metal Placards

Engraved ID Tag

Number Slot

Note: Not all ID Options are available on all products; see individual product pages for specific ID details.

Standard Engraving

Florence Manufacturing utilizes the USPS Standard **US Block 1L** font for all engraving. This 5/8" high engraving may be created with or without black color fill and can contain up to six characters, depending upon door size. Custom engraving is available upon request.

Contact your local Authorized Florence Dealer or call 800-275-1747 for additional details and/or samples of the ID options shown above.

A Name You Trust

Florence Manufacturing is pleased to continue to offer the 2600 American Device series of high security vault-type horizontal mailboxes designed especially for use in high crime and vandal prone areas. Boasting a unique three-point locking system (see image on facing page) and an interlocking feature on hinge-side of door, our American Device product line provides extra security if the hinge pin is tampered with. This line of horizontal boxes comes in both a front-loading with built-on trim (2600F-VT) option and rear-loading with snap-on trim (2600R–VT) option.

Note: Horizontal mailbox installations should be protected from direct exposure to the weather; Florence Manufacturing is not responsible for damage caused by weather conditions. Orders for non-standard mailbox configurations may not be accepted, or may result in longer lead times.

Company History

AF FLORENCE manufacturing company

Florence Manufacturing is proud to trace its heritage of founding and acquired companies to the late 1800s. For more than a century, the Florence line of postal specialties has maintained industry leadership by offering consistently superior product quality and rapid, reliable customer service. Our commitment to craftsmanship continues to be shown through not only being the first manufacturer in our industry to be ISO 9001:2000 certified, but that we continually surpass all required audits as well. We strive to be environmentally friendly with strong recycling programs and business practices and are pleased to be a committed community partner in our headquarters location of Manhattan, Kansas.

Founded by Saulia Florence and Herbert Dix in 1934 as Florence Manufacturing Company, we have continually strived to meet the changing market needs. As a dynamic, growing company, we acquired Auth Electric and started doing business as Auth-Florence Manufacturing in 1990. This hundred-year young company expanded our product offering to include Auth-Chimes – a quality product which has since been seen on the popular *Seinfeld* TV series. We significantly expanded our product offering once again with the acquisition of the American Device Postal Specialties line in July 1998. Two short years later, Florence Corporation acquired Cutler Manufacturing Corporation - a venerable century old company that had manufactured postal products for the likes of the Empire State Building and the John Hancock Building. Being awarded the USPS Outdoor Delivery Equipment contract in 2005 firmly solidified our position as a pillar of the industry. Florence Corporation further strengthened its market position with its recent acquisition by Gibraltar Industries (NASDAQ:ROCK).

Today, Florence Manufacturing continues to introduce new products to meet your mail delivery needs and we are looking to expand our product line once again with partnerships to provide outdoor site solutions. We are proud to have built relationships with the most extensive national dealer network in our industry - which enables us to provide you with local expertise in developing your specific mail center projects. To find an Authorized Florence Dealer nearest you, learn more about our extensive product lines or about our company, visit auth-florence.com. To learn more about our new parent company, visit gibraltar1.com.

Horizontal Mailbox System Lock Type Options - Private Delivery

Florence Manufacturing is pleased to supply locks for your horizontal mailbox systems; however, in some cases the selected lock may change your mail system to a private delivery system. Be sure to check with your local postal authority for clarification and your local Authorized Florence Dealer for product details.

Graphite type lubricants only are recommended on all product locks. For additional assistance with locks, contact your local locksmith.

lock suppliers

The following manufactured, customer-supplied locks (listed by cylinder number) are compatible with Florence mailboxes:

Arrow	AD615
Best	A7117
Falcon	6060,A11485,A11491,C982
Sargent	4101
Schlage	20-066,20-067,20-069
Weiser	11485,11491
Yale	C1810

Traditionally Built

Florence 1250 vertical series mailboxes are designed for use in small, multi-family buildings. They are constructed of durable, heavy-gauge extruded aluminum. Doors and trim are striated to resist scratching. Mailboxes feature a fully-recessed mount, semi-recessed mount, or surface mount option to complement any installation. Designed to meet USPS STD-4B+, the Florence 1250 series has stronger compartment locks and master doors that better resist the more common methods of tampering. These boxes are ideal replacement options to ensure your residents continue to have safe and secure mail delivery options.

- Anodized aluminum or anodized gold standard finish
- 5-pin cylinder locks with two keys, 1,000 key changes
- Resident name and number ID card holders

Did you know?

As of October 6, 2006, USPS STD-4C compliant mailbox systems are MANDATORY on all new construction and major renovations. Mailboxes that are 4B+ compliant, such as the Florence 1250 vertical series, will only be considered USPS Approved if they are replacing existing mailboxes. Be sure to check with your local postal authorities before undergoing any changes to your buildings mail system. This way you can ensure that secure and convenient mail delivery is not interrupted for you and your residents. Further details on the new mandatory STD-4C regulations can be found on page 14, by contacting your local Authorized Florence Dealer or by visiting auth-florence.com.

Optional Features

- 1255 series with integral 40 name directory
- Doorbell push buttons
- 1260 series with double wide door and optional outgoing mail slot
- Engraved doors
- Postal to private conversion kit
- Six powder coat color options

Note: Florence 1250 vertical series is for indoor use only, not rated for outdoor use

Lock Type Options

The 1250 vertical series comes standard with a Hudson K30809 lock.

Private Distribution is No Secret

It surprises some people that the USPS doesn't deliver directly to every mailbox in America. The concept of private distribution can seem even a bit strange; once delivered to a centralized location, it is distributed to individual resident mailboxes by a property manager or similar entrusted individual. Although a mystery to some, Florence Manufacturing understands the unique needs of residents who receive privately distributed mail. While certain needs such as keying and master access are different, other needs, like security, are the same. That is why we apply the expertise gained from our USPS partnership to these private distribution options - helping ensure all residents receive the same benefits.

70" max.

28" min.

3/4" plywood suggested (by others)

FINISHED FLOOR

The minimum wall opening depth is 17". The number of usable units is for rear-loading boxes. If figuring front-loading boxes, choose 1450 Series and deduct one usable unit per box for the master door.

Note: Horizontal mailbox installations should be protected from direct exposure to weather. The manufacturer is not responsible for damage caused by weather conditions.

Lock Type Options

Both the 1450 and 1550 horizontal series comes standard with a Hudson K30809 lock. Additional lock options or replacement locks are available, but not necessarily USPS Approved. Refer to page 31 for additional details.

Make the Most of Your Mail Room

There are plenty of frustrating things about managing a university mail room, so getting the right mailbox unit shouldn't be one of them. That's why Florence Manufacturing allows you to custom configure your mailbox to fit your specific needs. Get the right number of resident boxes, parcel lockers and outgoing mail compartments to keep your students and faculty happy while still keeping your mail area organized and free of clutter. Available in both front- and rear- loading options, Florence Manufacturing solves all your private distribution mail needs.

Installation

17" min. wall depth

The minimum wall opening depth is 17". The number of usable units is for rear-loading boxes. If figuring front-loading boxes, choose 1600 Series and deduct one usable unit per box for the master door.

70" max.

Note: Horizontal mailbox installations should be protected from direct exposure to weather. The manufacturer is not responsible for damage caused by weather conditions.

28" min.

3/4" plywood suggested (by others)

FINISHED FLOOR

Lock Type Options

Both the 1600 and 1700 horizontal series comes standard with a Hudson K30809 lock. Additional lock options or replacement locks are available. Refer to page 31 for additional details.

Reliability Every Step of the Way

Whether sending mail across town or across the country, it deserves protection from the beginning to the end of its journey. Just as resident compartments protect incoming mail, Florence Collection Boxes secure it while awaiting pick up by the USPS to help ensure safe mail right from the start. Florence Vertical Collection Boxes come in a choice of sizes for various installations to fit your individual project needs.

- LD12L wall liner available:
  - 8" standard unless otherwise specified
  - 4" to 12" available in full inch increments only
  - Specify straight or angled
- Can be used with 120SM Collection Box

The Value of Mail Collection

Meant for busy mail areas, a Florence Collection Bundle Box is a great way to add value and convenience to your building's mail system. As a large unit, a Collection Bundle Box can receive individual letters as well as bulkier, bundled metered mail. And with its heavy-gauge aluminum construction, even large volumes of mail are kept safe until picked up by the USPS. These units are designed for use alone, with Florence horizontal mailboxes, or can be sized to match the Florence 2600 American Device horizontal series; and are available in both front- and rear-loading options.

Standard Features

- Front loading (CCF series)
- Recess- (RM) or surface-mounted (SM)
- Master door and hopper door constructed of 1/4" aluminum

Opportunity May Knock Only Once... But We Let It Chime, Year After Year

For over a hundred years, property owners have relied on Auth-Chimes for high-quality, maintenance-free door enhancements. Our time proven design, quality materials and acoustically buffered strike pads work harmoniously to create a rich and distinctive two-note musical tone that is always pleasant to the ear. Our models allow your residents to see out, while preventing unwanted visitors from seeing in. And, because our chimes are not dependent upon electricity, you never have to worry about power failures, worn batteries, or frayed wires. Florence Manufacturing continues this proud tradition of exceptional design, unmatched durability and affordable elegance; so don't open the door to just anyone, let us find the right chime for your specific application.

Did you know?

All viewing lenses and mirrors feature secure, one-way visibility with wide angle viewing designed to fit doors up to 4-3/4" thick. UL fire rated options are also available and are designed to fit doors up to 2-1/2" thick.

Installation

A self-contained mechanical design allows all of our chimes to be easily installed with just a screwdriver and drill. Each unit comes complete with fastening hardware, positioning templates and easy-to-follow instructions. There are no wires, transformers, buzzer connections or electrical hook-ups to worry about, so forget the electrician. We are so confident of our product's performance, we offer a one-year warranty on all parts that cease to function due to normal wear and tear.

key keepers
200 series

Organization is Key

Between key rings and mysterious labels, keeping track of keys for numerous resident units can be a nightmare. But a Florence Key Cabinet is just the tool to help property managers get the upper hand and get rid of all those key rings. Each cabinet includes numbered tags that hang in corresponding slots so you can find any key and know which keys are loaned out. The locking cabinets are available in sizes to store anywhere from 30 to 715 keys, giving you access to all your unit keys without lugging around the whole collection. For organization and security, a Florence Key Cabinet is the property manager's best friend.

201-9110-03

K26P-C	Push button electrical switch type with five-pin cam lock

Replacement Keys

The loss of a mailbox key can be a frustrating experience. For emergency key situations, contact a local locksmith or hardware store. If neither of those are able to assist you, Florence Manufacturing maintains an inventory of key blanks for all Florence mailboxes as well as cut keys for select products. (Make sure to have the manufacturer and number from the key handy for reference sake.)

Orders for replacement keys may be placed through a local locksmith or your local Authorized Florence Dealer. There are instances in which security constraints prevent the cutting of new mailbox keys, in which case we offer replacement locks available through an Authorized Florence Dealer.

superior customer service

Florence Manufacturing is proud to provide a complete support team to serve all your needs. Not only are customer service representatives ready to assist you with locating an Authorized Dealer or answering your product questions, but a full team of engineering, design, marketing and sales professionals are available as well. This dedicated team can help ensure your project goes as planned each step of the way. Simply call 800-275-1747 or visit auth-florence.com for details.

stock items / parts

Using contemporary manufacturing processes and equipment in our fully automated 192,000 sq. ft. facility, our efficient, vertically integrated production and quality control standards enable Florence Manufacturing to maintain an inventory of our most popular products. In many instances, these items can ship within 48 hours of ordering. We also offer a variety of replacement parts for each of our product lines. Simply visit our website and click "Parts" to view a complete listing by product.

returns

All product shipments are adequately packaged, but should be thoroughly inspected upon receipt, and *prior to acceptance,* for potential damage in transit. Returned goods will not be accepted without a returned goods authorization (RGA) number from Florence Manufacturing. Contact your local Authorized Florence Dealer to obtain your RGA number and return address. Stock products may be returned within 90 days of original invoice and are subject to a 30% restocking fee. Custom orders cannot be returned or exchanged.

care and cleaning

The surface of all Florence products may be cleaned with any mild detergent or properly diluted biodegradable water-based cleaner (such as Simple Green™) and a soft cloth. The use of petroleum-based solvents, ammonia, harsh abrasive cleaners, or scrubbing sponges is not recommended, as in some cases it may damage the product. Cleaning with a damp soft cloth is appropriate. Touch-up paint may be available from an Authorized Florence Dealer for those products which utilize powder coating finish.

limited warranty

Florence Manufacturing Company provides a five-year warranty, from the date of shipment, covering defects in material and workmanship of all equipment. This warranty guarantees factory replacement and/or repair of all defective items. This warranty does not cover replacement of batteries or any other comsumable items, or damage due to improper installation, mishandling, misuse, or acts of nature. We make no other warranties of any kind, either expressed or implied.

Florence Manufacturing is proud to have set the design standard for all USPS approved CBUs manufactured in the United States.

Get a Quote

Florence Manufacturing has developed extensive online resources to assist with all your projects. Whether you are an architect looking for a three-part specification, a builder needing product dimensions and rough opening calculations, or a property manager looking for the latest in postal regulations, it is all at auth-florence.com. Plus, our nationwide dealer locator not only assists you in finding your local dealer, but will show you installations they have done within the area. Using our one-of-a-kind mailbox configurator gives you superior resources right at your finger tips.

quotations and installation

A local Authorized Florence Dealer is standing by to provide an individual product or complete project quote - as well as product specification, installation and/or any necessary technical documents you may require. To quickly submit a quote request, visit auth-florence.com, add your desired selections to your shopping cart and click QUOTE THIS ITEM. Our Authorized Dealers are also ready to assist with your specific product installation needs. Most products are shipped pre-assembled and ready for final installation; however, further assistance is available from many local Authorized Dealers. It is always a good idea to consult with local postal authorities for local approval and current installation requirements to complete all USPS approved product installations.
