

The MS® Hookbolt deadlock answers the security need of sliding glass doors in commercial, industrial and institutional buildings. The mechanism is identical to the widely used Maximum Security swinging door lock, except that the massive laminated bolt is provided in a hook shape to resist the parting motion of sliding door and jamb. The overcenter MS[®] locking action assures that forced entry attempts to pry the door in any direction, up, down or sideways, will be defeated.

Operation

360° turn of key or thumbturn throws or retracts the counterbalanced bolt. Key can be removed only when bolt is in a positively locked or unlocked position. Lock accepts any standard 1-5/32" diameter mortise cylinder or thumbturn from either or both sides. Cylinder must have MS® dimensioned cam. (See page SW-28).

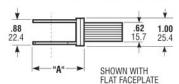

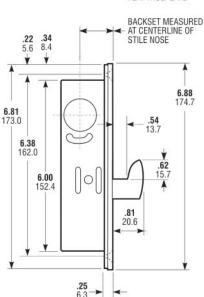

MS 1850S-050 Deadbolt

DIMENSIONS

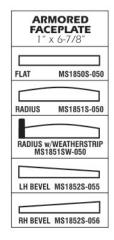

INCHES

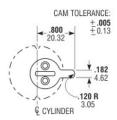

Nominal, subject to tolerance extremes.

BACKSET	"A"
7/8" 22.0	1.57 39.9
31/32" 24.6	1.63 41.4
1-1/8" 28.6	1.78 45.2
1-1/2 " 38.1	2.25 57.1

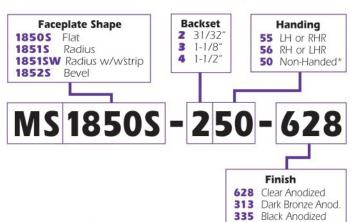

Cylinder Cam

MS1850S-050 Series locks are operable by any standard 1-5/32" diameter mortise cylinder with special MS® cam dimensioned as shown. Cylinders with MS® cams can be readily obtained from most cylinder manufacturers. See page SW-28 for cylinder make and trim ring information.

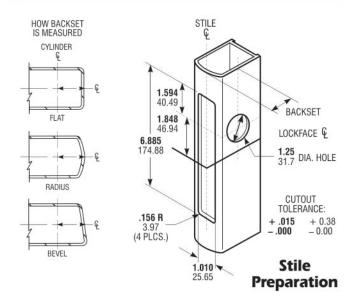

HOW TO ORDER

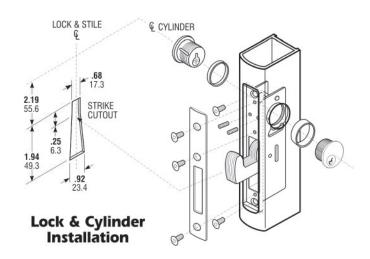

Specify quantity and the following information.

Order related hardware separately.

INSTALLATION

OPTIONS

Cylinder backset and faceplate finish and shape (radiused, flat or bevel cross-section to match door nose) must be specified.

STANDARD PACKAGE

Individually boxed with machine screws for mounting. Cylinders and/or thumbturn available at extra cost. Shipping weight: 1-1/2 lbs. Also available in a 25 unit pack for volume users.
